

Rear Windshield Wiper Blade

This is a rear windshield wiper blade designed for automotive use. The durable construction incorporates a rubber blade for effective water removal and a secure attachment mechanism for easy installation.

Product Overview

Universal Rear Visibility Solution

This rear windshield wiper blade is designed for reliable, all-weather performance in demanding automotive environments. Featuring a high-quality synthetic blend rubber squeegee, it ensures effective water removal and long-term durability. The blade is engineered to meet or exceed original equipment manufacturer standards, providing a secure fit and optimal contact for clear visibility.
