

Rebar Bending Machine

This rebar bending machine is designed for construction and metalworking tasks. It accurately bends various sizes of rebar.

Overview

Heavy-Duty Rebar Bending Solution

This robust rebar bender is engineered specifically for demanding construction and metalworking environments. It features precision angle adjustment and intuitive controls, ensuring efficiency and accuracy for various rebar sizes. Built for durability and performance, the machine incorporates essential safety protocols to protect operators during heavy-duty tasks.

Technical Specifications

Model Identifier	RB-25
Machine Class	Mini Machinery

Safety & Compliance

Operational Protocols

- Read and understand manual before operating
- Ensure proper operation to avoid serious injury

Required Safety Equipment	Safety Glasses, Gloves
---------------------------	------------------------

Features

Key Features

Angle Adjustment Table • Load Wheel Commutation Table • Heavy-Duty Construction
