Product Overview

High-efficiency automated straightening and cutting unit

Industrial Rebar Processing

This fully automatic CNC rebar straightening and cutting machine is engineered for high-precision metal processing in construction and manufacturing. It combines advanced straightening rollers with a high-performance cutting system to deliver consistent, accurate lengths. Designed for durability and efficiency, this heavy-duty unit is mounted on wheels for improved mobility across workshop or factory floors.

Technical Specifications

Programmable CNC control interface for precise parameters

Robust construction with adjustable rollers

Model	GTQ 4-14
Working Capacity	4-14mm
Motor Power	26 kw
Power Supply	380V 3 phase
Net Weight	1250 kg
Dimensions (L*W*H)	2500*800*1000mm

Buying Information

Warranty	2 years
Certifications	ISO, SGS, 3C
Minimum Order Quantity	1
