

Recessed Halogen Downlight Fixture

This recessed halogen downlight fixture is suitable for indoor lighting applications. It features a circular trim with multiple slots and a reflective interior to maximize light output.

Product Overview

Professional Recessed Downlight Solution

This recessed halogen downlight fixture is engineered for versatile indoor lighting applications in both residential and commercial environments. The design features a precision-engineered circular trim with integrated slots and a highly reflective interior, ensuring optimized light output and distribution. Built with a robust housing unit, the fixture provides secure installation and effective heat dissipation for reliable long-term performance.

Design & Construction

Installation Type	Recessed
