

Recessed LED Troffer Light with Prismatic Diffusers

This troffer light is designed for recessed installation in standard suspended grid ceilings. It features a rectangular form factor with three distinct light channels, each equipped with a prismatic diffuser to optimize light distribution and minimize glare.

Product Overview

Professional Commercial Lighting

The RF-LPTM6060A3 recessed LED troffer is engineered for high-performance illumination in commercial and industrial suspended grid ceilings. Featuring a three-channel design with prismatic diffusers, it provides uniform light distribution while effectively minimizing glare. Its robust construction ensures long-term durability and consistent reliability in demanding environments.
