

Recessed Parabolic Louver Lighting Fixture

This recessed lighting fixture features a parabolic louver design for efficient and controlled light distribution. The durable metal housing with a reflective interior maximizes light output, providing uniform illumination with minimal glare.

Product Overview

Professional Recessed Lighting Solution

This recessed parabolic louver lighting fixture is engineered for optimal light control and distribution in commercial and industrial settings. The design features a durable metal housing with a high-reflectivity interior to maximize efficiency while significantly reducing glare. Versatile and reliable, this fixture is designed to support both modern LED tubes and traditional fluorescent lighting.

Technical Specifications

Design Style	Recessed Parabolic Louver
Compatible Light Sources	LED Tubes, Fluorescent Tubes
Construction	Durable metal housing with reflective interior

Performance Metrics

Key Performance Indicators

1 High

Glare Reduction Efficiency

1 High

Light Uniformity

Application

Primary Applications

- Commercial offices
- Industrial workspaces
- General indoor facility lighting
