

# Rechargeable 9V Lithium Battery 350mAh

This rechargeable 9V lithium battery offers a capacity of 350mAh. It incorporates a built-in circuit protection board and is compatible with all 9V universal chargers.

## Overview

### High-Capacity Rechargeable 9V Lithium Battery

This rechargeable 9V lithium battery is designed for reliable, long-lasting power. Featuring a high capacity of 350mAh, it provides consistent energy for various devices. The battery is equipped with an integrated circuit protection board to ensure safe operation and is compatible with all standard 9V universal chargers.

## Technical Specifications

### Capacity

**350 mAh**

Rated Capacity

<b>Battery Chemistry</b>	Lithium-ion
<b>Nominal Voltage</b>	9 V

## Safety & Compatibility

<b>Safety Features</b>	Built-in circuit protection, Overcharge protection
<b>Charger Compatibility</b>	Compatible with all 9V universal chargers

## Certifications

### Quality Standards

ISO 9001:2000
