

Rechargeable Batteries with USB Charger Compatibility

High-performance rechargeable batteries designed for various electronic devices. These batteries offer long-lasting power and are compatible with a range of USB chargers.

Product Overview

High-Performance Rechargeable Solution

These rechargeable batteries are engineered to provide long-lasting, reliable power for a wide variety of electronic devices. Featuring robust construction for enhanced durability, they are designed to withstand frequent use in professional and consumer applications. With versatile USB charger compatibility, these batteries offer a convenient and efficient power solution for portable electronics, flashlights, and remote controls.

Technical Specifications

Primary Applications

- Flashlights
- Remote Controls
- Portable Electronics
