

# Rechargeable Battery Cell for Electronic Devices

This high-capacity rechargeable battery cell is designed for various electronic applications. It features a compact, rectangular form factor with a metallic casing for durability and efficient heat dissipation.

## Overview

### High-Performance Rechargeable Cell

This high-capacity rechargeable battery cell is engineered for reliability in a wide range of electronic applications. Featuring a compact, rectangular form factor with a durable metallic casing, it ensures efficient heat dissipation and robust protection. It serves as an ideal power source for portable devices, power banks, and various consumer electronics requiring consistent energy delivery.

## Technical Specifications

### Rated Capacity

**450 mAh**

Capacity

### Model Number

LJ383040A

## Design & Build

### Form Factor

Rectangular

### Casing Material

Metal

## Applications

### Typical Applications

Power Banks, Portable Devices, Electronic Equipment
