

Rechargeable Battery for Electronic Devices

This high-capacity rechargeable battery is designed for digital cameras and other electronic devices. It provides reliable power for extended use and includes overcharge and short circuit protection.

Overview

High-Performance Power Solution

This high-capacity rechargeable battery is engineered specifically for digital cameras and a wide range of portable electronic devices. It is designed to provide reliable, consistent power for extended operational periods, ensuring your equipment stays ready when needed. With integrated safety features such as overcharge and short-circuit protection, this battery combines high energy density with robust performance standards.

Technical Features

Performance Attributes

High Energy Density • Optimized Longevity

Safety & Protection

Overcharge Protection, Short Circuit Protection

Compatibility

Compatible Devices

- Digital Cameras
- Portable Electronic Devices
