

Rechargeable Battery Pack for Communication Devices

This is a high-capacity rechargeable battery pack designed for professional communication devices. It ensures extended operational time and reliable power delivery and includes safety certifications.

Product Overview

Professional Power Solution

This high-capacity rechargeable battery pack is engineered specifically for professional communication devices, ensuring extended operational time and consistent power delivery in demanding environments. It is built to meet rigorous safety standards, providing reliability for critical communication needs. Please ensure compatibility with your specific charging systems and follow all provided safety guidelines for optimal performance.

Technical Specifications

Battery Chemistry	NI-MH
Nominal Voltage	4.8 V
Capacity	4200 mAh
Model Identifier	SK-B401

Charging Information

Standard Charge

16 hrs Charge Duration	420 mA Charge Current
----------------------------------	---------------------------------

Compliance & Safety

Safety Instructions

- Do not disassemble
- Do not short circuit
- Do not dispose of in fire
- Use specified charger only
- Do not charge over 24 hours

Certifications	CE
