

Rechargeable Digital Camera Battery

This is a high-capacity rechargeable battery for electronic devices such as digital cameras and camcorders. It has multiple contact points and regulatory markings.

Product Overview

High-Performance Rechargeable Power

This rechargeable battery is engineered for reliable performance in digital cameras and camcorders. Designed with a robust housing and precise contact points, it ensures consistent power transfer for demanding electronic devices. It meets essential safety and regulatory standards, making it a dependable choice for professional equipment powering.

Technical Specifications

Voltage	3.7 V
Model Identifier	BK-V12U
Power Type	FTP

Compliance & Standards

Certifications	CE, US
