

Rechargeable Electric Lint Remover

This is a handheld device designed to remove lint, fuzz, and pills from clothing and fabrics. It uses a rotating blade system beneath a protective mesh and is powered by a rechargeable internal battery.

Overview

Professional Fabric Care Solution

This compact, handheld electric lint remover is designed to effectively restore the appearance of various fabrics, including wool, cotton, and synthetics. Equipped with a rotating blade system and a protective mesh, it safely removes lint, fuzz, and pills without damaging garments. The device features an ergonomic design for comfortable handling and includes a detachable container for easy debris disposal.
