Overview

Effective Pest Control Solution

This rechargeable electric mosquito swatter is designed for efficient pest control, featuring an integrated LED light for operation in low-light conditions. The device utilizes a high-performance zapping mechanism to eliminate flying insects quickly and safely. With its ergonomic design and cordless operation, it is an ideal tool for both indoor and outdoor environments, providing a convenient alternative to chemical repellents.

Technical Specifications

Surface Width	225 mm
Total Length	520 mm

Power & Battery

Battery Capacity

400 mAh

Capacity

4 V

Voltage

Battery Chemistry	Lead-acid
Charging Voltage Range	110-220V

Logistics

Packaging Information

Specification	Value
Quantity per Carton	50 pcs
Carton Dimensions	67 x 37 x 55 cm
