

Rechargeable Electric Water Bottle Pump

This rechargeable electric water bottle pump provides a portable solution for dispensing water. It features a built-in rechargeable battery and is designed for easy installation and consistent water flow.

Product Overview

Convenient Water Dispensing Solution

The BP-32 rechargeable electric water pump provides a seamless and hygienic way to dispense water from 3 and 5-gallon bottles. Designed with safety in mind, it is constructed from high-quality, odorless, and non-toxic ABS plastic, ensuring water quality is maintained. Its automatic electric operation makes it perfect for home, office, or outdoor environments where reliable water access is required.
