

Rechargeable Electric Wine Opener

This electric wine opener is designed for effortless cork removal. It features a streamlined design and simple button operation.

Product Overview

Effortless Wine Opening Experience

This rechargeable electric wine opener is designed to streamline the wine opening process, taking only 8 seconds to remove a cork. It features a durable ABS construction and operates quietly at under 70 decibels. With a built-in NI-MH battery capable of opening 30 bottles on a single charge, it offers reliable performance for both home and professional use.
