

# Rechargeable Emergency Fan with LED Lamp

This rechargeable fan is designed for emergency use and general ventilation. It features both AC and DC power options and an integrated lamp for illumination.

## Product Overview

### Versatile Emergency Ventilation and Lighting

The LW-6H is a multifunctional rechargeable fan designed for reliable performance during power outages or off-grid scenarios. Engineered with an energy-efficient BLDC motor, it offers adjustable speeds and dual AC/DC power operation for maximum versatility. This unit also integrates a powerful LED lamp, providing extended illumination and ventilation to ensure comfort and safety in critical situations.

## Technical Specifications

Fan Speed Range	1500 rpm
Motor Technology	BLDC (Brushless DC) - 60% energy savings
Fan Size	10 inch

## Power & Battery

### Battery Capacity

**6 V**

Voltage

**4.5 AH**

Capacity

Battery Type	Lead-acid (Maintenance-free)
--------------	------------------------------

Power Protection Features	Overcharge Protection, Over-discharge Protection, AC/DC Automatic Transfer
---------------------------	----------------------------------------------------------------------------

## Lighting

### LED Lamp Performance

**10 pcs**

LED Count

**65 hrs**

Working Time

## Performance

### Fan Runtime Estimates

Setting	Approx. Runtime
Maximum Speed	5 hours
Minimum Speed	40 hours
