

Rechargeable Handheld Bug Zapper

This rechargeable electric bug zapper is designed to eliminate flying insects such as mosquitoes, flies, and gnats. It features a racket-shaped head with an electrified grid and is powered by a rechargeable battery for cordless operation.

Product Overview

Effective Insect Control

This handheld rechargeable insect zapper provides a clean, chemical-free solution for eliminating flying pests like mosquitoes, flies, and gnats. Its racket-shaped design allows for precise, physical control, while the integrated rechargeable battery ensures cordless mobility for both indoor and outdoor use. The device features simple operational controls and safety indicators, offering a modern alternative to traditional sprays.

Technical Specifications

Key Features

- Electrified grid mesh
- Integrated power switch
- LED operational indicator
- Lightweight ergonomic design
