Product Overview

Versatile Emergency Lighting

This rechargeable LED emergency light bulb is engineered for reliability in diverse environments, from home use to outdoor and vehicle applications. Featuring a high thermal conductivity aluminum plate for superior heat dissipation, it ensures long-lasting performance. The integrated 1200mA lithium battery provides up to 4 hours of continuous light, with a quick 3-hour recharge cycle via a 5V low-voltage USB connection.

Technical Specifications

Battery Capacity	1200 mA
Battery Type	18650 Lithium
Recharge Time	3 H
Discharge Time	4 H
Charging Voltage	5 V

Features

Lighting Modes

- 100% Brightness
- 50% Brightness
- Night-light
- Flash
- Warning Distress

Design Highlights

Aluminum Plate Heat Dissipation • IC Constant Current Design • USB Rechargeable

Protection Features

Moisture proof, Insect proof, Dust proof

Applications

Suitable Environments

- Home
- Outdoor
- Parking Lot
- Vehicle
