

Rechargeable LED Work Light with Flexible Head

This rechargeable work light features 21+5 LEDs providing 800 LUX. It is constructed from polycarbonate and operates on a 3.6V NiMH battery with a charging time of 1 hour.

Product Overview

Professional Work Illumination

This rechargeable LED work light features a flexible head design for precise positioning in demanding professional environments. Equipped with a high-capacity NiMH battery system and dual lighting configurations, it provides reliable performance for tasks requiring versatility. Its robust polycarbonate construction ensures durability for mechanics, electricians, and tradespeople.

Technical Specifications

Battery Capacity	1800 mAh
Battery Chemistry	NiMH
Charging Time	1 h
