

Rechargeable LED Work Light with Tripod

This rechargeable LED work light offers portable illumination for diverse applications. It features a durable construction, adjustable tripod stand, and long-lasting battery for use in workshops, construction sites, and emergency situations.

ADDITIONAL IMAGES

Product Overview

High-output SMD LED array providing 360-degree illumination.

Versatile Industrial Lighting

This rechargeable LED work light provides 360-degree, glare-free illumination suitable for indoor and outdoor professional applications. Built with an impact-resistant PC lens and a powder-coated metal frame, it ensures durability in demanding environments like construction sites and workshops. The integrated retractable tripod and foldable design offer excellent portability, while the long-lasting Li-ion battery supports extended operation for various site requirements.
