

Rechargeable LED Work Light with USB Power Bank

This rechargeable work light features rugged aluminum construction and protective corner bumpers for drop resistance. It includes high and low settings, adjustable beam focus, stepless dimming control, a rotating stand and handle, and a power bank feature.

Product Overview

Versatile Professional Lighting Solution

This rechargeable LED work light is engineered for demanding professional environments, offering high-intensity illumination with a robust, impact-resistant design. It features a versatile green-accented housing with reinforced corner bumpers to ensure long-term durability on job sites. Additionally, the integrated USB power bank functionality adds utility by allowing users to charge devices while on the go.
