

Rechargeable Lithium-Ion Battery

This high-capacity rechargeable lithium-ion battery is designed for various electronic devices. It offers a voltage of 3.7V and a capacity of 750mAh, ensuring long-lasting performance and multiple recharge cycles.

Product Overview

Reliable Power Solution

This high-capacity rechargeable lithium-ion battery is engineered to deliver consistent and reliable power for a wide range of electronic devices. With its compact form factor, it is an ideal energy solution for digital cameras, flashlights, and other compatible equipment. Designed for longevity, this battery supports multiple recharge cycles, ensuring extended performance and cost-efficiency for professional applications.

Technical Specifications

Voltage	3.7 V
Capacity	750 mAh
Battery Type	Li-ion (Lithium-Ion)
Model Designation	RCR-V3

Features

Key Features	Rechargeable, High-Capacity, Compact Design, Long-Lasting
