

# Rechargeable Lithium Polymer Battery 3.7V 1000mAh

This is a rechargeable lithium polymer battery pack with a 1000mAh capacity and 3.7Wh. The nominal voltage is 3.7V with a charge limit voltage of 4.2V.

## Overview

### High-Performance Lithium Polymer Battery

This rechargeable lithium polymer battery offers a reliable power solution with a 1000mAh capacity and 3.7V nominal voltage. Designed for versatility, it is suitable for a wide range of portable electronic devices. The unit is engineered to meet strict safety standards, ensuring consistent performance and durability for professional applications.

## Electrical Specifications

Nominal Voltage	3.7 V
Rated Capacity	1000 mAh
Energy Rating	3.7 Wh
Charge Limit Voltage	4.2 V

## Physical and Compliance

Model Number	602760
Compliance Standards	GB31241-2014, CQC

## Safety and Handling

### Safety Instructions

- Do not disassemble, impact, or squeeze
- Do not throw into fire
- Do not place in high-temperature environments
- Immersion in water is prohibited
- Discontinue use if severe swelling occurs
