

Rechargeable Ni-MH Batteries Assortment

This assortment includes rechargeable Ni-MH batteries. The batteries come in various sizes and capacities suitable for different electronic devices.

Product Overview

Versatile Rechargeable Power Solutions

This assortment of Nickel-Metal Hydride (Ni-MH) rechargeable batteries provides a reliable power source for a wide range of electronic applications. Designed for consistency and longevity, these cells are available in various standard sizes and capacities to meet diverse operational requirements. Ideal for professional equipment, these batteries offer a sustainable and cost-effective alternative to single-use power sources.

Technical Specifications

Available Capacities

- 600mAh
- 700mAh
- 1000mAh

Form Factors

AA • 2/3A

Battery Chemistry

Ni-MH (Nickel-Metal Hydride)

Voltage

1.2V

Key Metrics

Performance Highlights

1.2 V

Standard Voltage

1000 mAh
