

Rechargeable NiCd Batteries

These rechargeable NiCd batteries come in various capacities, including 300mAh, 800mAh, 1000mAh, 1600mAh, and 5000mAh. They are suitable for use in electronic devices and industrial applications.

Product Overview

Reliable Nickel-Cadmium Power Solutions

These rechargeable Nickel-Cadmium (NiCd) batteries are engineered for diverse electronic and industrial applications, offering a dependable power source for various devices. With multiple capacity options ranging from 300mAh to 5000mAh, they provide flexibility to meet specific power requirements. Their rechargeable nature supports cost-effective, long-term usage and reduces environmental impact compared to single-use alternatives.

Technical Specifications

Available Capacities

- 300mAh
- 800mAh
- 1000mAh
- 1600mAh
- 5000mAh

Chemistry	Nickel-Cadmium (NiCd)
-----------	-----------------------

Nominal Voltage	1.2 V
-----------------	-------

Charging Information

Charging Standards

Capacity	Standard Charge Time	Standard Charge Current
300mAh	16 hours	30mA
1600mAh	16 hours	160mA

Product Features

Key Features	Rechargeable, Industrial Grade, Multiple Capacities, Cost-Effective
