

Rechargeable Portable Fan with LED Lighting and Solar Panel

This rechargeable fan offers cooling and illumination during power outages or in areas without electricity. It features a solar panel for charging, multiple fan speeds, and LED lighting for versatile use.

Overview

Versatile Cooling and Lighting Solution

This 12-inch rechargeable emergency fan is engineered to provide reliable cooling and illumination in areas without grid access or during unexpected power outages. Featuring a robust 5-blade design and integrated LED night lights, it offers both comfort and visibility. The unit is designed for maximum portability and sustainability, supported by dual AC/DC operation and an included solar panel for eco-friendly charging.
