

Rechargeable SMD LED Camping Lantern

This rechargeable SMD LED lantern is designed for emergency lighting and general illumination. It features a built-in rechargeable battery for cordless operation, along with high and low light settings.

Product Overview

Versatile Lighting Solution

This rechargeable SMD LED lantern is designed for both emergency preparedness and outdoor recreation, providing reliable illumination whenever needed. Built with a high-efficiency SMD light source and a durable plastic housing, it is engineered to withstand regular use. The unit offers flexible brightness settings and convenient cordless operation, making it an ideal choice for camping, emergency lighting, or general utility tasks during power outages.

Technical Specifications

Input Voltage	AC220V 50Hz
Input Power	5 W
LED Configuration	80pcs Super Bright SMD (0.06W each)

Power and Performance

Operational Metrics

4400 mAh

Battery Capacity

3.7 V

Battery Voltage

10 Hours

Max Charging Time

Runtime by Intensity

Mode	Runtime
High	Approx. 3.5 Hours
Low	Approx. 7 Hours

Features

Suitable Applications

- Emergency Lighting
- Camping
- Outdoor Activities
- Indoor Utility
