

Rechargeable Table Fan with LED Light

This rechargeable table fan features adjustable fan speeds and an integrated LED light. It is designed for convenient use during power outages or in areas where electrical outlets are not readily available.

Product Overview

Versatile Portable Cooling and Lighting

This rechargeable table fan is designed for reliability and convenience, making it an essential tool for power outages or off-grid environments. It features a dual-function design that combines efficient air circulation with integrated LED lighting. With a robust lithium-ion battery system, it provides extended runtime for both the fan and light, ensuring comfort and visibility when needed most.

Power & Battery

Battery Capacity	6000 mAh
Battery Type	18650 Lithium-ion
Charging Time	8 Hrs
Input Voltage	DC5V

Performance

Performance Metrics
