

Rechargeable Wall-Mounted Fan with LED Light

This rechargeable fan features a 6V 4Ah/5AH sealed lead-acid battery and a bright 34 LED light. It is a wall-mounted 12" oscillating fan with high and low speed options and includes a remote control.

Overview

Versatile Cooling and Lighting Solution

This rechargeable wall-mounted fan provides a dual-function solution, combining efficient air circulation with a built-in 34 LED light panel. Ideal for emergency situations or areas with limited power access, it features both AC and DC operation and includes overcharge and overdischarge protection. The integrated remote control and pull-string switch allow for easy operation in any environment.

Technical Specifications
