

Reciprocating Air Compressor with Horizontal Tank

This is a reciprocating air compressor with a horizontally oriented tank. It features a twin-cylinder pump, an electric motor, and is mounted on wheels for portability.

Product Overview

High-Efficiency Reciprocating Air Compressor

This reciprocating air compressor is engineered for reliability and consistent performance in demanding industrial environments. Featuring a robust twin-cylinder pump and a horizontal tank configuration, it delivers a steady supply of compressed air for various pneumatic applications. Designed with portability in mind, the unit is mounted on durable wheels, allowing for easy repositioning across your workspace.

Technical Specifications

Pump Configuration	Twin-cylinder reciprocating
Tank Design	Horizontal
Power Source	Electric Motor

Features

Suitable Applications

- General Pneumatic Tools
- Workshop Maintenance
- Industrial Air Supply

Portability	Wheeled Chassis, Portable Design
