

# Reciprocating Refrigeration Compressor Unit

This reciprocating refrigeration compressor unit offers high efficiency, lower running costs, and easier operation. It can be applied in food preservation, freezing and refrigerating, low temp processing and air conditioning control.

## Product Overview

### Industrial Refrigeration Solution

This high-performance reciprocating refrigeration compressor unit represents over 40 years of engineering refinement. Engineered for industrial environments, it focuses on high efficiency, reduced operational costs, and simplified maintenance. Its robust design ensures consistent performance across diverse cooling and freezing requirements.

## Performance Specifications

### Evaporative Temp Range

**-70 °C**

Minimum Temperature

**5 °C**

Maximum Temperature

## Applications

### Suitable Industries

Food Preservation, Freezing and Refrigeration, Low Temp Processing, Marine Air Conditioning, Industrial Cooling

## Key Features

### Operational Advantages

- Higher efficiency design
- Lower running costs
- Easier operation
- Convenient maintenance
- Robust industrial construction

## Equipment Details

### Included Components

- High-performance compressor motor
- Integrated control panel
- Pressure gauges
- Indicator lights
