

# Reciprocating Saw Blade and Screwdriver Bit Set

This set includes three 6-inch reciprocating saw blades designed for cutting wood, plastic, and metal, along with a set of ten slotted single-end screwdriver bits. The saw blades feature a universal shank for compatibility with most reciprocating saws, while the screwdriver bits are constructed from high-strength steel for durability and long life.

## Product Overview

### Professional Cutting and Fastening Kit

This versatile tool kit combines high-performance reciprocating saw blades with a set of reliable screwdriver bits. Designed for professional use, the saw blades feature a universal shank for broad compatibility, while the screwdriver bits are crafted from high-strength steel to ensure long-term durability. This combination is ideal for various cutting and fastening tasks across wood, plastic, and metal materials.
