

Reciprocating Suction Gas Air Compressor

This is a reciprocating suction gas air compressor. It is designed with a multi-cylinder configuration and a powerful electric motor.

Product Overview

Industrial Reciprocating Suction Gas Air Compressor

This range of high-performance reciprocating suction gas air compressors is designed for demanding industrial and marine applications. These units feature robust multi-cylinder configurations mounted on heavy-duty base frames for optimal stability and vibration control. Built for reliability, these compressors provide efficient pressure delivery at standardized industrial voltages and frequencies.

Technical Specifications

Compressor Performance Data

Model	Capacity (m ³ /h)	Pressure (bar)	Power (kW)	Speed (RPM)
TCAX181465	100	30	22	600
TCAX2216137	243	29.4	55	900
TCAX2216146	243	29.4	55	900
TCWX22/14AT	410	30	90	800
TCWX221433	280	30	63	600

Standard Electrical Requirements

440V, 60Hz
