

# Recirculating Water Chiller for CNC Laser Router

This recirculating chiller is designed to manage cooling requirements in laser CNC routers. It helps maintain temperature stability and extend the operational life of the equipment.

## Product Overview

### High-Efficiency Industrial Cooling

The CW-5200 recirculating chiller is engineered to provide precise temperature control and cooling for laser CNC routers and various industrial equipment. It is designed to stabilize operating temperatures, helping to extend the service life of high-performance machinery. Featuring a compact footprint and reliable thermal regulation, this unit is an essential addition for manufacturers prioritizing equipment longevity and production quality.

## Technical Specifications

### Cooling Capacity

**1400 W**

Cooling Capacity

### Pump Power Options

- 0.03 KW
- 0.05 KW
- 0.1 KW

### Tank Capacity

6 L

## Performance

### Maximum Lift

- 10 M
- 25 M

### Maximum Flow Rate

- 10 L/min
- 16 L/min

## Certifications & Compliance

### Regulatory Compliance

CE • RoHS

## Physical Dimensions

### Dimensions & Weight

Metric	Unit
Unit Dimensions	58 x 29 x 47 cm
Packing Dimensions	70 x 43 x 58 cm
Net Weight	26 kg
Gross Weight	29 kg
