

Recoil Starter Assembly for Small Engines

This recoil starter assembly is designed for small engines commonly found in handheld machinery. It facilitates easy engine starting through a pull cord mechanism.

Product Overview

Reliable Engine Starting Solution

This recoil starter assembly is engineered for seamless integration with small engine machinery, such as brush cutters and trimmers. It features a durable housing with integrated ventilation grilles to ensure optimal airflow during operation. Designed for efficiency, the pull-cord mechanism provides smooth and reliable engine ignition for professional and maintenance applications.

Technical Specifications

Design Features

- High-durability housing
- Integrated ventilation grilles
- Ergonomic pull-start handle
- Compact assembly design

Primary Application

Brush Cutters • Trimmers • Handheld Machinery

Compatible Series

G42L Series
