

Rectangular Composite Piping

This rectangular composite piping features three internal square channels. Its composite construction provides a rigid and uniform profile suitable for various applications.

Product Overview

High-Performance Composite Piping

This rectangular composite piping is engineered for structural rigidity and durability. Featuring a distinct three-channel hollow design, it offers a versatile solution for various industrial and construction applications. The material is finished with a durable, wood-like grain pattern, combining aesthetic appeal with robust performance.

Physical Characteristics

Profile Shape	Rectangular hollow section
Internal Channels	3
Channel Shape	Square

Material & Finish

Material Composition	Composite
Finish	Wood-grain texture
Color	Reddish-brown
Material Properties	Rigid, Uniform, Composite
