

Rectangular Duct Air Conditioning Unit

This rectangular duct air conditioning unit is designed for installation within ductwork systems. It features a compact design with a finned heat exchanger and blower fan for efficient heat transfer and forced air circulation.

Product Overview

High-Efficiency Duct Unit

The GRD-120 is a professional-grade rectangular duct air conditioning unit designed for seamless integration into residential and commercial HVAC systems. Featuring a compact form factor and robust metallic casing, this unit utilizes an advanced finned heat exchanger to ensure optimal thermal transfer and consistent airflow. It is engineered for reliable, forced-air circulation in demanding ductwork environments.

Technical Specifications

Suitable Applications

- Residential HVAC
- Commercial HVAC
- Forced Air Systems

Model Number	GRD-120
Construction	Rectangular Duct, Metallic Casing, Finned Heat Exchanger
