

Rectangular Electronic Equipment Vent

This rectangular vent facilitates air circulation in electronic equipment. It is designed for flush mounting with visible screw holes for secure installation.

Product Overview

Professional Ventilation Solution

This rectangular electronic equipment vent is engineered for optimal airflow management in sensitive electronic enclosures and architectural systems. Featuring a durable black finish and a flush-mount design, it ensures seamless integration while maintaining necessary thermal regulation. The unit includes pre-drilled corner screw holes for quick and secure installation in various industrial or commercial settings.

Physical Characteristics

Shape	Rectangular
Color	Black
Mounting Style	Flush-mount
Design Features	Horizontal Slats, Corner Screw Holes

Applications

Primary Applications

- Electronic Equipment Enclosures
- Architectural Ventilation
- Air Circulation Systems
