

Rectangular Frame Exhaust Fan

This electrical fan is designed for efficient air circulation and ventilation. The fan features a multi-blade propeller enclosed within a rectangular frame, constructed from durable black plastic.

Product Overview

Efficient Air Circulation

This rectangular frame exhaust fan is engineered for effective air circulation and ventilation in both household and commercial environments. It features a multi-blade propeller design enclosed within a sturdy rectangular frame to ensure focused and reliable airflow. Constructed from durable black plastic, this unit combines robustness with a sleek, professional aesthetic suitable for various installation settings.

Physical Characteristics

Material	Durable black plastic
Design Features	Rectangular Frame, Multi-blade Propeller, Compact

Performance

Application Areas

- Household Ventilation
- Commercial Air Extraction
- Cooling Systems
