

Rectangular Reflectors for Road Safety

These rectangular reflectors enhance visibility on roadways and in other low-light environments. The reflectors are designed to improve safety and provide clear signaling.

Product Overview

Visibility and Safety Enhancement

These rectangular reflectors are engineered to improve visibility in low-light environments, serving as a critical component for road safety and signaling. Designed for durability, the set includes high-visibility orange and red components each featuring integrated white reflective dots. These markers are ideal for industrial or roadside applications where clear visual indicators are essential.

Technical Specifications

Unit Configuration

- Set of six reflectors
- Two-dot variants
- Three-dot variants

Available Colors

Orange • Red

Material

High-durability plastic

Design Features

Rectangular shape, High-visibility, Reflective dots
