

Rectified Turpentine Oil Solvent

Rectified turpentine oil is a clear, colorless solvent extracted from pine resin. It is used in the industry for paints, varnishes, and cleaning purposes.

Product Overview

Professional Grade Rectified Turpentine

This rectified turpentine oil is a premium, clear, and colorless solvent derived from high-quality pine resin. Designed for industrial and artistic applications, it serves as an effective solvent for paints, varnishes, and rigorous cleaning processes. Its volatile and flammable nature makes it ideal for professional environments requiring reliable evaporation and thinning performance.

Technical Specifications

Appearance	Clear and colorless liquid
Origin	Pine resin
Properties	Volatile, Flammable
Odor	Characteristic pine odor

Applications

Use Cases

- Paint solvent
- Varnish thinning
- Industrial cleaning
- Artistic applications
