

Recycled LLDPE Plastic Film Bales

Bales of recycled Linear Low-Density Polyethylene (LLDPE) plastic film with 98% purity. These bales consist of clear or lightly colored LLDPE film, sorted as a lower grade within the prime color range.

Product Overview

Recycled LLDPE Plastic Film Bales

These recycled Linear Low-Density Polyethylene (LLDPE) plastic film bales are specifically sourced and prepared for industrial recycling processes. Featuring a 98% purity level, the material consists of clear or lightly colored film, categorized as a lower grade within the prime color range. These bales are compressed for efficient logistics and are ready for use in facilities dedicated to manufacturing new plastic products.

Material Specifications

Grade Category

Lower Grade • Prime Color Range

Material Type

Linear Low-Density Polyethylene (LLDPE)

Purity Level

98 %

Color Classification

Clear, Lightly Colored

Logistics and Handling

Primary Application

- Plastic recycling facilities
- Production of new plastic goods

Packaging Format

Compressed Bales
