

Red Copper Wire End Junction

Red copper end junctions ensure secure and reliable electrical connections. They are ideal for terminating wires and cables in various industrial and electrical applications.

Product Overview

High-Performance Red Copper End Junctions

These high-quality red copper end junctions are engineered for secure and reliable electrical terminations. Designed for industrial and electrical applications, they offer superior conductivity and excellent corrosion resistance. Their robust construction ensures long-lasting, dependable connection points for various wire and cable setups.

Technical Specifications

Material

Red Copper

Key Performance Features

- Optimal electrical conductivity
- High corrosion resistance
- Robust, long-lasting connection
- Versatile sizing for various wire gauges

Model Identifier

P-1705

Primary Applications

Industrial, Electrical Wiring, Cable Termination
