

Red Spherical LED Indicator Light Bulb

This is a compact, energy-efficient LED indicator light bulb featuring a vibrant red spherical light-emitting dome. It is designed for various indication purposes and features a standard screw-in base for easy installation.

Product Overview

Compact Visual Signaling Solution

This compact, energy-efficient LED indicator light bulb features a vibrant red spherical dome designed for clear visual signaling. Engineered for durability and reliable performance, it is an ideal choice for control panels, appliances, and various industrial indication applications. With its standard screw-in base, the unit ensures quick and easy installation for professional maintenance and assembly environments.

Technical Specifications

Light Color	Red
Shape	Spherical
Light Source	LED
Base Type	Standard screw-in

Application & Use

Key Features

- Energy-efficient LED technology
- Durable construction
- High-visibility spherical dome
- Simple installation process

Common Applications	Control Panels, Appliances, Industrial Signaling
