

Reed Pulp and Paper Bleaching System

System processes 50000 tons per annum of reed pulp. It also handles bleaching of 60000 tons per annum of reed pulp.

Overview

Industrial Bleaching System

This industrial-grade reed pulp and paper bleaching system is engineered for high-capacity production environments. Designed for efficiency and reliability, the system has received recognition for its engineering design excellence. It serves as a robust solution for facilities aiming to optimize their pulp processing workflows.

Capacity and Performance

Project Capacity

50000 t/a

Bleaching Capacity (Lower)

60000 t/a

Bleaching Capacity (Upper)

Awards and Recognition

Industry Awards

- China Light Industrial Total Meeting Excellent Engineering Design Award (1993)
- National Excellent Design Exposition (1993)
