

Reflector Compact Fluorescent Lamp

This reflector compact fluorescent lamp (CFL) replaces incandescent reflector bulbs. It features a parabolic aluminized reflector (PAR) shape for focused light output and energy efficiency.

Overview

Energy-Efficient Reflector Lighting

This Reflector Compact Fluorescent Lamp (CFL) is engineered as a high-performance replacement for traditional incandescent reflector bulbs. Utilizing advanced compact fluorescent technology, it delivers a soft, diffused light output while consuming significantly less power than conventional alternatives. Its parabolic aluminized reflector (PAR) design ensures focused illumination, making it an excellent choice for professional recessed, track, and accent lighting applications.

Technical Specifications

Lamp Technology	Compact Fluorescent Lamp (CFL)
Reflector Shape	Parabolic Aluminized Reflector (PAR)
Base Type	Standard Screw Base

Features & Benefits

Key Advantages	Energy Efficient, Long Lifespan, Focused Output, Soft Diffusion
----------------	---

Applications

Recommended Applications

- Recessed lighting
- Track lighting
- Accent lighting
