

Reflector Flood Light Bulb

This reflector flood light bulb has a standard screw base. The bulb is designed to direct light in a focused beam and is suitable for accent lighting, task lighting, and general illumination.

Product Overview

Professional Reflector Flood Light

This high-quality reflector flood light bulb is engineered to provide a focused, high-intensity beam of light, ideal for specialized applications. Featuring a durable clear glass housing and a standard screw-base design, it offers reliable performance for accent, task, and general illumination requirements. The integrated internal reflector maximizes light output, ensuring efficient energy distribution for your professional lighting projects.
