

Refracting Telescope with Tripod

This refracting telescope is mounted on a tripod for stable viewing. It features an optical tube assembly, focusing mechanism, and eyepiece, suitable for astronomy enthusiasts.

Product Overview

Professional Entry-Level Refracting Telescope

This refracting telescope is designed for amateur astronomers and hobbyists eager to explore the cosmos. Featuring a high-quality optical tube assembly and a precise focusing mechanism, it allows for clear viewing of celestial objects. The included stable tripod base provides the necessary foundation for accurate tracking and viewing adjustments, making it an ideal choice for night sky exploration.

Technical Specifications

Telescope Type	Refracting
Mount Type	Tripod

Key Features

Product Highlights

- Optical tube assembly for clear imagery
- Advanced focusing mechanism
- Stable tripod for precise tracking
- Easy-to-use interface for hobbyists

Certifications & Usage

Target User	Amateur Astronomers, Hobbyists
