

Refractor Astronomical Telescope for Students

This refractor telescope features a 30mm aperture and a 360mm focal length. It is designed for students interested in astronomy.

Overview

Introduction to Astronomy

This refractor astronomical telescope is specifically designed for students and children interested in exploring the night sky. Featuring a 50360 optical model, it provides clear and bright images suitable for observing celestial objects. The unit comes with a sturdy tripod for stable viewing, making it an ideal entry-level instrument for beginners.
